

Benelli importer
Mike Puzey

BENELLI NEWS:

The enthusiastic bunch from Puzey motorcydes in Randburg have just uncrated the 2013 range of Benelli motorcydes.

From their stunning little Café 600 to the more touring oriented Tre-k Amazonas. They have a beautiful selection of delectable machines for your perusal – best you get down there and have a looksee.

Most interesting to us was the 130BHP 1130cc Tre-k Amazonas – you'll remember that we tested the 2009 model quite extensively in previous issues. We took the 2013 for a quick spin and the improvements over the older model are significant and include:

NEW 2013 TRE-K Amazonas

- New forks with 20mm more travel, compression, rebound and spring tension adjustments.
- Softer Rear suspension, compression and rebound. Hand adjustable preload.
- Wider and better touring seat

• Fuel injection changes for smoother delivery and longer range

- STD fitment Brembo brakes front and rear.
- Sachs suspension front and rear.
- EXEL Rims and up rated spokes STD
- Softer compound tires fitted.
- Heavy duty O ring Chain STD

The net result is a bike with a stunning engine that is far more capable on the gravel than the previous models. It still retains a lot of superbike performance and handling - but the suspension and handling in the dirt is significantly better than it used to be.

The importers are giving the factory input as to what we south Africans need all the time. There are now a whole bunch of optional extras available for this machine, making it even more capable for your next adventure. These include touring Kits, crash bar kits, screen deflectors and top boxes. Power mapping kits for this machine will be available soon.

- Crash bar kits with LED lights available.
- Screen deflectors, top boxes and panniers available.
- Updated Foot gear system available.
- Power mapping kits for +15 BHP available soon.

The Amazonas 1130 retails for R142990.
